- Hardworking - I am not afraid to put in the time to get things done on schedule and with the right specs
- Creative - I am very open to thinking outside the box; working with a team or alone to get the best result while being mindful of deadlines and client expectations.
- Skillful - I love to learn new things and put them into practice but not letting go of the tried and true, if it works let's make it better without reinventing the wheel
- Integrity - It is very important to me to do my work right and with integrity, I don't "good enough".

My Story

I have always been technically minded. From being the admin assistant/"IT girl" to Credentialing Specialist/"DBA" to working with customers in Geek Squad and lastly Auditor/"Form Designer". My roles have always evolved to include a technical and design aspect outside of the job description and different from my co-workers. I have always felt that pull to do something more. Finally I took the steps to make those "extra parts" my actual job. I did quite a bit a research before making my decision to code. I am now 100% sure I made the right decision as you can see from my projects. Please take another look and feel free to [contact](#) me anytime!
